Life University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097: Telephone number 404-679-4501) to award the Doctor of Chiropractic, Master of Science, Bachelor of Science and Associate of Science degrees.

"The Doctor of Chiropractic degree program of Life University's College of Chiropractic is accredited by the Commission on Accreditation of the Council on Chiropractic Education, 8049 North 85th Way, Scottsdale, AZ 85258-4321. Tel: 480-443-8877." Any questions or complaints regarding Life University's compliance with CCE's accrediting criteria should be addressed, telephoned and/or faxed as above.

The Core Life Proficiencies

In conjunction with providing health care degree programs, Life University is committed to delivering an education designed around a set of core proficiencies that advance personal integrity and provide the foundation for professional success, social contribution and cultural change. These proficiencies distinguish a Life University education.

Belief Systems and Performance

Life University will expose its students to a range of contemporary intellectual approaches and technologies that will help them reach higher levels of performance and success. Students will learn criteria by which to judge the usefulness of certain technologies and their applicability to their learning styles.

Communication and Relationship Theory/Skills

An ability to communicate effectively and the capacity for building relationships with others are critical factors in personal, business and life success. These skills can be developed. Life University will challenge its students to develop and utilize the skills of effective listening, empathy, interpersonal skills and public speaking to create clear communications and foster meaningful professional relationships with members of the public, patients, colleagues and key opinion leaders.

Contemporary Scientific Paradigms

For thousands of years and especially since Sir Isaac Newton, humankind's scientific understanding of the functioning of the universe has been based largely on a mechanistic model. Contemporary quantum physics opens the door to a much more vitalistic understanding of human dynamics. Life University will expose our students to the implications of these models especially as they apply to research in health care.

Integrative Change

Because change is one of the few constants in today's professional environments, an educated person must learn how to evaluate, plan for and effectively use the element of change to impact controlled differences in the world. Life University will expose students to tested theories and concepts and help them evaluate their usefulness. Students will also learn how people integrate and accept new philosophies and skills for communicating new concepts of health care.

Integrity and Citizenship

Integrity provides the underpinning for the responsible exercise of our rights and responsibilities as human beings. Integrity leads to empowerment and excellence, while a lack of integrity results in mediocrity. Life University teaches students how to manage personal integrity and function as valued citizens within the academic, health care and larger communities.

Leadership and Entrepreneurship

Extensive research available today outlines the hallmarks of effective leadership. Life University draws on this body of knowledge and teaches students how to apply it in an entrepreneurial setting to build a successful business or organization.

Learning Theory/Critical Thinking

Life University engages students in critical thinking by teaching them how to gather meaningful data, synthesize new information with existing knowledge, think independently and search for practical application of their knowledge in professional practice and daily life. We exhort our students to not only learn skills, but to become innovators who contribute positively to their communities.

Philosophy of Human Existence and Health Care Policy

Health care systems evolve from health care philosophies. Although our most institutionalized systems today revolve around a mechanistic view of health, Life University sees value in a vitalistic view of human function. With a growing body of evidence to support vitalistic concepts in the health care milieu, Life University will help spearhead changes that will revolutionize our nation's approach to health care. Our faculty will clearly identify these key issues for students and teach them how to evaluate new information and direct professional dialogues that will lead to new health care policy.

LIFE UNIVERSITY HONOR CODE

All members of the Life University community are entrusted with the responsibility of upholding ethical goals and values. Essential to the fundamental purpose of Life University is a personal commitment to the principles of citizenship and integrity.

Integrity provides the underpinning for the responsible exercise of our rights and responsibilities as civil human beings within our community. Integrity leads to empowerment and excellence, while a lack of integrity results in mediocrity. Life University teaches students how to achieve and maintain personal integrity and function as valued citizens within the academic, health care and larger communities.

As individuals and members of the Life University community, we commit ourselves to act with civility, honesty, and responsibility, and above all, with integrity and honor. We are accountable for all that we say, write and do. We are responsible for the academic integrity of our work. We pledge that we will not misrepresent our work, nor give or receive unauthorized aid. We commit ourselves to behave in a manner which demonstrates concern for the personal dignity, rights and freedoms of all members of the community. We are respectful of Life University property and the property of others. We will not tolerate a lack of respect for these values by anyone.

"INTEGRITY; CARRY IT WITH YOU"
