

Life University Pediatric and Prenatal Certification Program by Dr. Claudia Anrig

Instructor: Lydia Dever D.C.

Course Title: Introduction to Normal and Abnormal Pediatric X-rays

1 Hour Virtual Course

Course Description

Review of Pediatric films and associated cases. Identifying normal findings on a pediatric film and correlation of abnormal findings and subluxation findings while comparing them to the chief complaint or patient history.

- 1) Normal Pediatrics' films - review what a normal pediatric film looks like as compared to an adult film
- 2) Common cases seen in pediatric practice.
 - Torticollis
 - Bedwetting
 - AS Occiput
 - Scoliosis
 - Anomalies
 - Loss of normal curves
- 3) Not so common cases seen in pediatric practice.
 - Cerebral Palsy
 - More to come....waiting on cases with films
